

This article is about the game that comes with this title, "blur game english language pack 133". I am writing this blog post because I want to make people aware of the game and its title. This game is for people who are learning English. It helps these people learn how to make sentences in English by playing games. There are six different types of games that can be played with players having six chances on each level. The first time I played the game, I had no idea what was happening, but after a few levels, I understood what was going on and improved my vocabulary as well as my grammar skills thanks to this interesting quiz-type created by Gameloft back in 2013. Now, the reason why I am writing this is because of the title of this game. The title 'blur' is a word used for when you can't see clearly something. For example, if you are driving and it's raining, you can't see clearly where to go because all you see are raindrops on your windshield. But now, have raindrops in front of your eyes but are not blurry at all due to poor distance or obstructions? If so, what would you do? My point is that the title 'blur' is confusing for people who're learning English. "Blur" is not a word that should be used since it doesn't make sense. What would you do if someone asked you, "How's the weather?" and you replied, "The weather is blurry.?" People won't understand what you mean at first and they will ask you to repeat what you said. You will repeat what you said and they will ask "what does blurry really mean?" because all they see is the sun shining through the clouds and nothing around them is blurred except for their vision by the bright sunlight shining through the clouds which isn't really a bad thing at all. I think it would be better to have 'clear' in place of 'Blur'. Clear can mean an object or place that's visible, easy to see, and not blurred at all. Some people might argue that the word clear is too simple, but I think that this game will help learners improve their English skills because there are six different games that can be played with six chances on each level. This game is for people who want to learn English by playing games. I'm pretty sure this game will help people learn how to make sentences in English by making use of short sentences. It will give learners a better understanding of certain words or punctuation marks by using real sentences or phrases. The reason why I think this game will help learners is because there are six different types of games that can be played with six chances on each level. This article is about the game that comes with this title, "blur game english language pack 133". This game is for people who are learning English.
